Experiences

April 2022 - Present
Glints | Bali, Indonesia (Remote)
Web Software Engineer | Front-end

- Improve glints.com site performance by 20 - 30%
- Revamp, architect and co-maintain internal design system project: https://github.com/glints-dev/glints-aries
- Integrate e2e tests automation with release pipeline for reliable feature releases
- Contribute to various company product features

January 2020 - March 2022
Nintex | Kuala Lumpur, Malaysia (Remote)
Senior Engineer | Front-end

- Main contributor to NextGen Forms Converter, a tool that helps customers migrate their existing Office 365 workflows to Nintex Cloud. This tool has a massive impact on the company's revenue and control over features without relying on Microsoft
- Main contributor to unifying Nintex Forms theme with products across Nintex
- Main contributor to Nintex Forms, which is one of the company's core products

April 2019 - December 2019
Apar Technologies | Kuala Lumpur, Malaysia
Senior Engineer (Contract) | Front-end

- Main contributor to MARS, an interactive and comprehensive application used by DHL Customer Service Agents for parcel pickup bookings, quote estimations, tracking, and tracing, among other functions
- Introduce automation tests to the team

June 2016 - January 2019
Arvato System | Kuala Lumpur, Malaysia
Senior Technical Consultant | Front-end

- Migrate code base from AngularJS to Angular while still delivering new features
- Main contributor to MediaPortal, a centralized media hub. It provides access not only to diverse sources like newsfeeds, social media, internal and external archives, and MAM systems but also allows users to collect, curate, and share this content within one search logic and an intuitive design
- Coach junior engineers in the team

May 2013 - March 2016
GfK | Kuala Lumpur, Malaysia
Senior Analyst Programmer | Front-end

- Deliver a full text search feature for STREAM, an automatic data capturing application which enables GfK's internal and external auditors to audit sales data faster and more accurate from the retailers to be further processed and analyzed in form of reports
- Main contributor in numerous projects in the company

Experiences

May 2010 - March 2013

HTC Global Services | Kuala Lumpur, Malaysia

Software Engineer

- Main contributor to Back-end Code Management System BCOMS, software application integrating master and detailed lists of materials to build hard disks. BCOMS allows Western Digital engineer to get necessary information such as the materials and where to find them to build a certain hard disk model, also to help expedite the process of requesting respective departments to supply the raw materials needed.
- Main contributor to Statistical Process Control SPC, a reporting dashboard for Western Digital engineers to provide a better picture of the hard disk production quality at a glance or in detailed view in the form of Bar, Box, and Plot charts.
- Main contributor to Reporting Workbench, a reporting dashboard to provide Western Digital engineers and the upper managements with quantity and quality of hard disk parts production to help them with production planning.
